

KARANKUMAR S

Graphic Designer | AI-Assisted Design Specialist

skarankumar452@gmail.com | +91 63692 91778 | Madurai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Graphic Designer with 1.7+ years of experience at a German fitness brand (SportsTech), specializing in AI-assisted design, brand identity, and digital content creation. Proficient in Adobe Creative Suite, Blender, and AI tools (Midjourney, Runway ML, Kling). Reduced production time by 50% through AI workflow automation.

WORK EXPERIENCE

Graphic Designer | *SportsTech — German Fitness Brand*

May 2026 – Present

- Designed product visuals, promotional materials, and brand assets using Adobe Photoshop, Illustrator, and Canva for social media and e-commerce platforms.
- Leveraged AI tools (Higgsfield, Midjourney, Runway ML, Kling, Freepik) to generate images and videos at scale, reducing production time by 50%.
- Built AI automation workflows using Weavy AI and ComfyUI, cutting manual effort by 30% and delivery time from 3 days to under 1 day.
- Created 3D product renders in Blender and optimized Amazon product listings with AI-generated visuals to boost click-through rates.
- Designed and developed Amazon product gallery images including lifestyle shots, infographics, and comparison charts to enhance product presentation and drive conversions.
- Built and designed Amazon product detail pages (PDPs) with compelling A+ content layouts, feature banners, and brand story sections to improve customer engagement and conversion rates.

TECHNICAL SKILLS

Graphic Design: Adobe Photoshop, Adobe Illustrator, Canva, Blender, Brand Identity, Typography, Layout Design

AI Image & Video: Midjourney, Flux, Higgsfield, Freepik, Kling, Veo 3.1, Runway ML, Pika Labs, ElevenLabs

AI & Automation: ChatGPT, Gemini Studio AI, ComfyUI, Weavy AI, AI Prompt Engineering

Design Specialties: Photo Editing, Compositing, Retouching, Vector Graphics, 3D Rendering, Social Media Design

EDUCATION

Bachelor of Computer Applications (BCA)

2022

Kamarajar University, Tamil Nadu, India

KEY ACHIEVEMENTS

- Reduced asset production time by 50% through AI prompt engineering and workflow automation.
- Cut manual design effort by 30% and delivery time from 3 days to under 1 day using Weavy AI pipelines.
- Managed all design deliverables independently for an international fitness brand across social media, e-commerce, and Amazon channels.
- Engineered advanced Weavy AI node-based automation workflows to connect design tools, content pipelines, and delivery systems — eliminating repetitive tasks and enabling fully automated asset production at scale.
- Integrated Claude AI (Anthropic) into creative workflows via Claude Cowork to automate content briefs, generate design prompts, and streamline cross-team collaboration — reducing brief-to-execution time significantly.
- Adopted emerging AI tools including Claude AI, Weavy nodes, and ComfyUI pipelines as part of a continuous learning approach, staying ahead of industry trends in AI-powered design automation.
