

FLUX IMAGE EDITING

UGC_IMAGES_CREATION
IN FLUX

HOW TO CREATE UGC IMAGE IN THE FLUX?

We changed the reference image to create a user-generated image using Flux. First, we changed the background to make the room style look like a European-style room.

I got a prompt for the image, suitable wall colors, and floor. We used the edit option in Flux, uploaded the image, and added the prompt to change the background and wall colors.

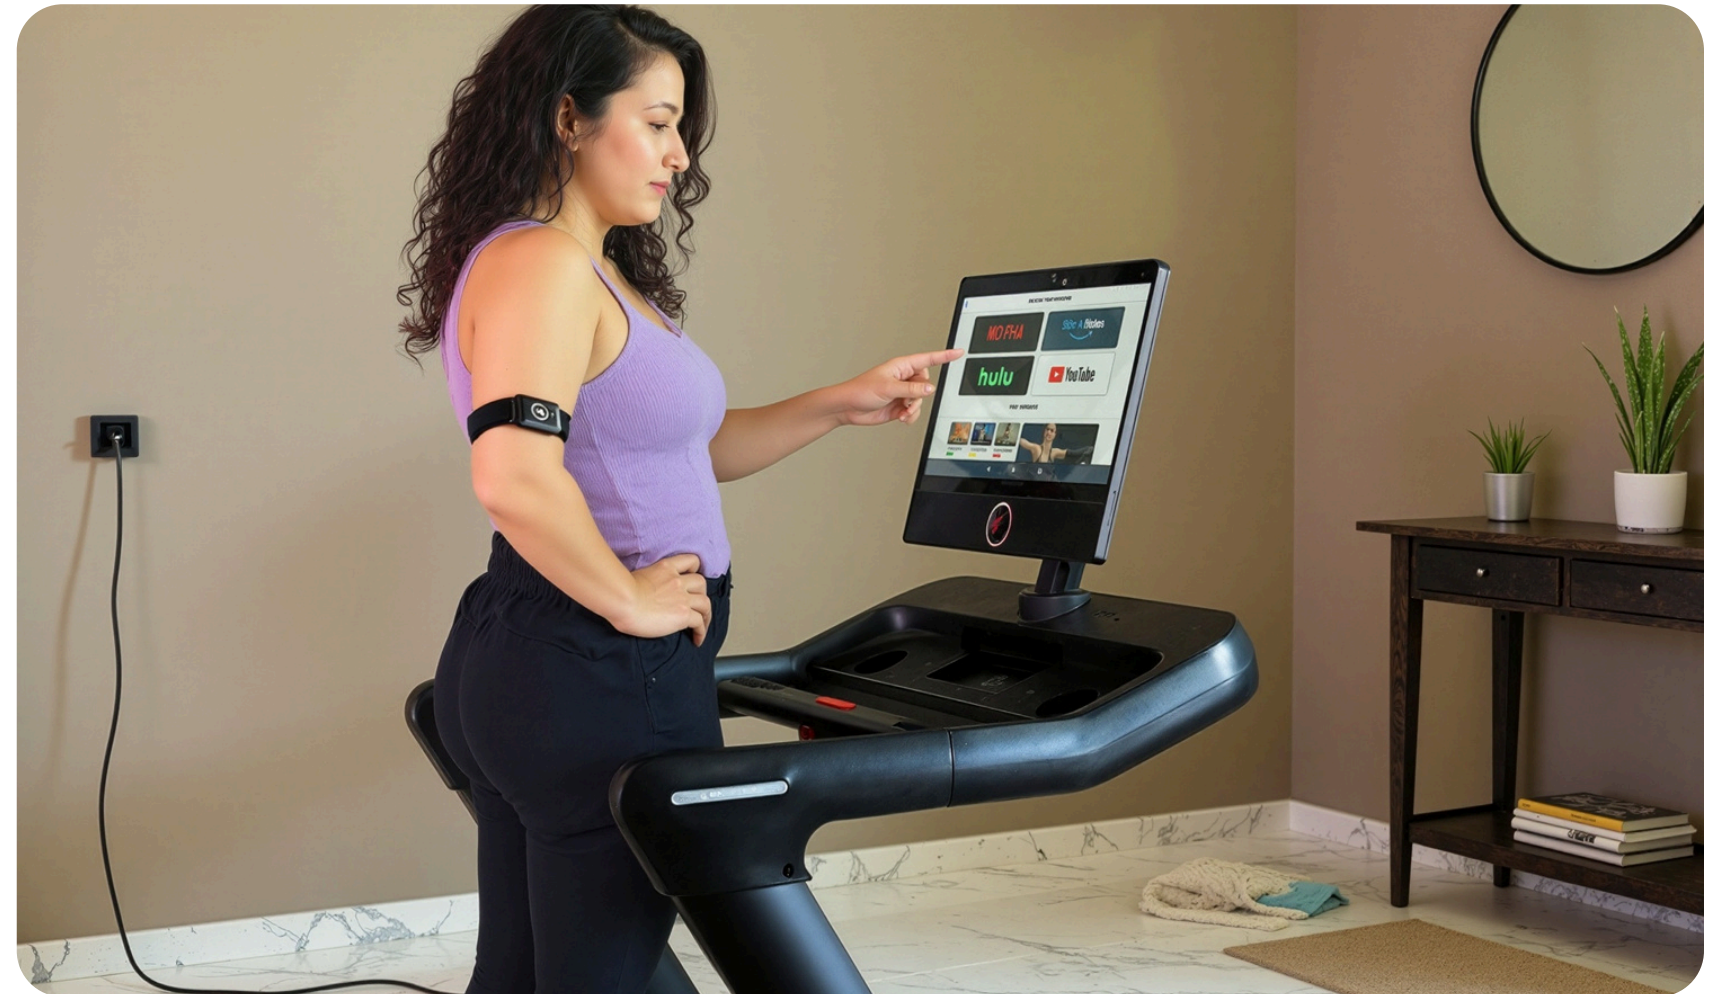

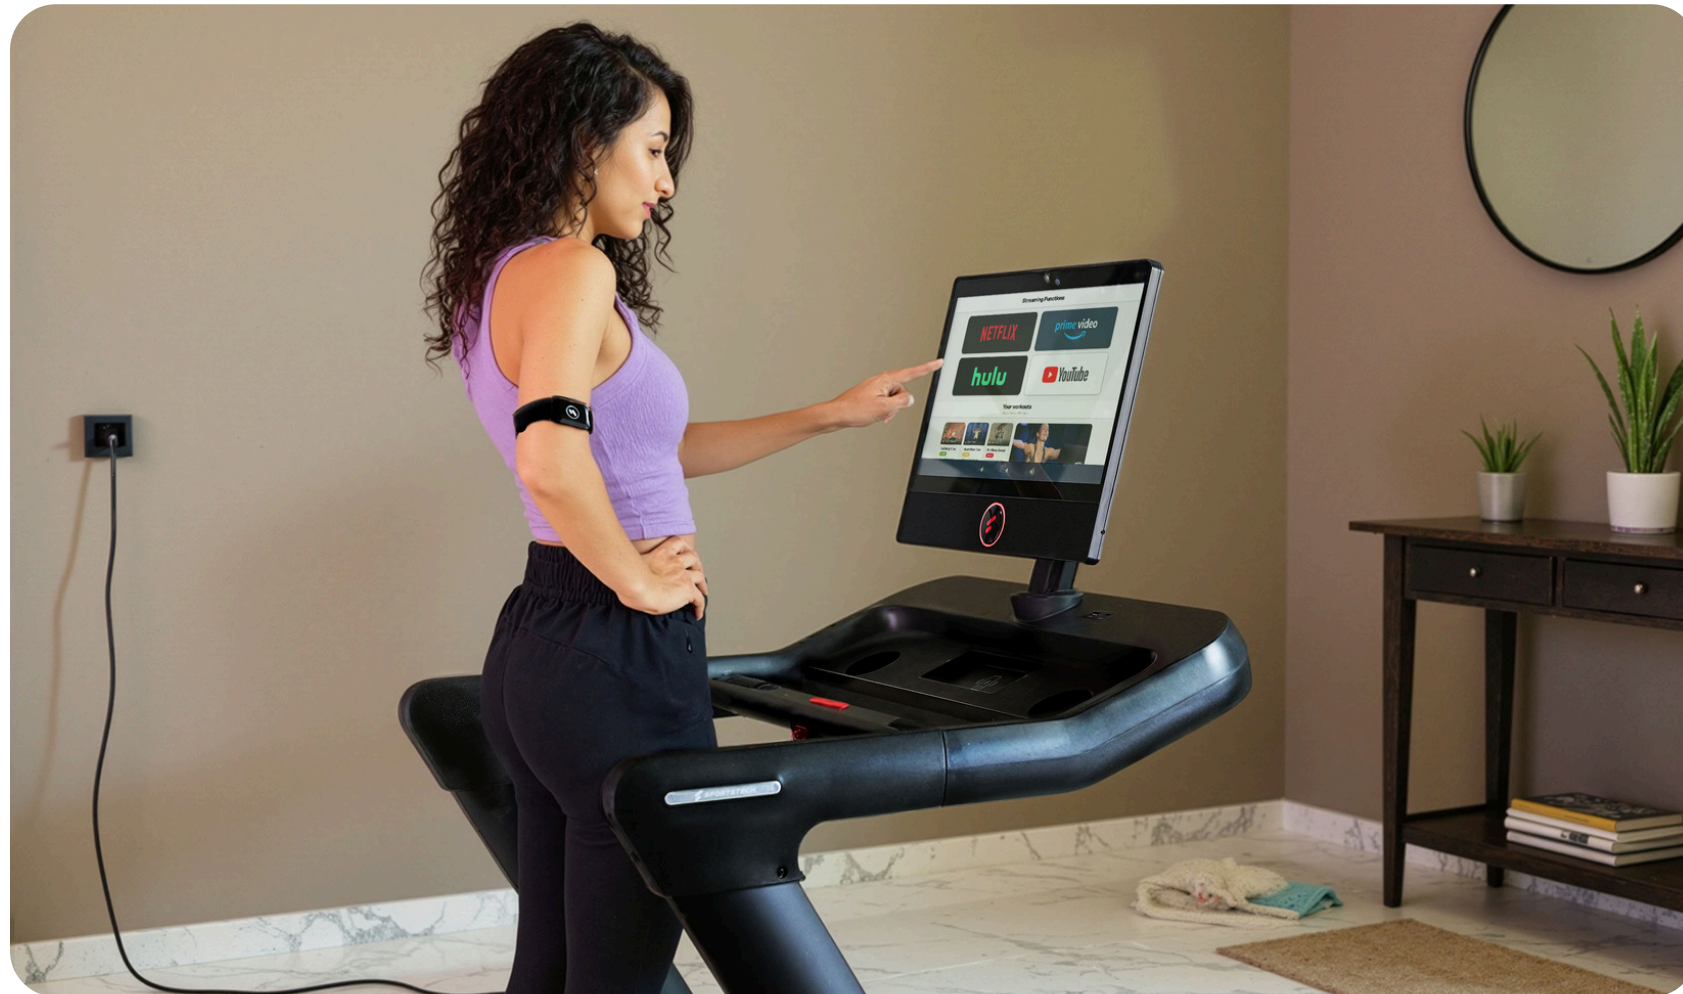

PROMPT FOR THIS IMAGE

Generate a highly realistic image of a modern home workout room with a warm and cozy atmosphere. The floor should be light wood with visible wood grain and natural texture, giving the space a relaxed, homey vibe. In the foreground, position a black high-tech treadmill with sleek metallic accents and a large screen attached to the front, showing an exercise program. To the side, place a person in a green athletic t-shirt and black shorts, performing a lunge on a black exercise mat with the brand 'Rogue' visible. The person should have a toned physique and be wearing white athletic shoes. The workout area should include a dresser on the left with a plant beside it, and an open bed with beige bedding in the background, creating a comfortable, lived-in feel. The room should have soft, natural sunlight streaming in through a window on the right, casting shadows that align with the room's lighting. The overall scene should convey a blend of modern fitness equipment and cozy living space, with a realistic, photo-like quality and clear details in the textures and lighting.

OUTPUT

Prompt to change the character physique weight

Prompt for The Image

A 70 KG WOMAN WITH A REALISTIC BODY PHYSIQUE

ADD THE ELEMENT IN THE GENERATED IMAGE

Old prompt:

Prompt for this Image:

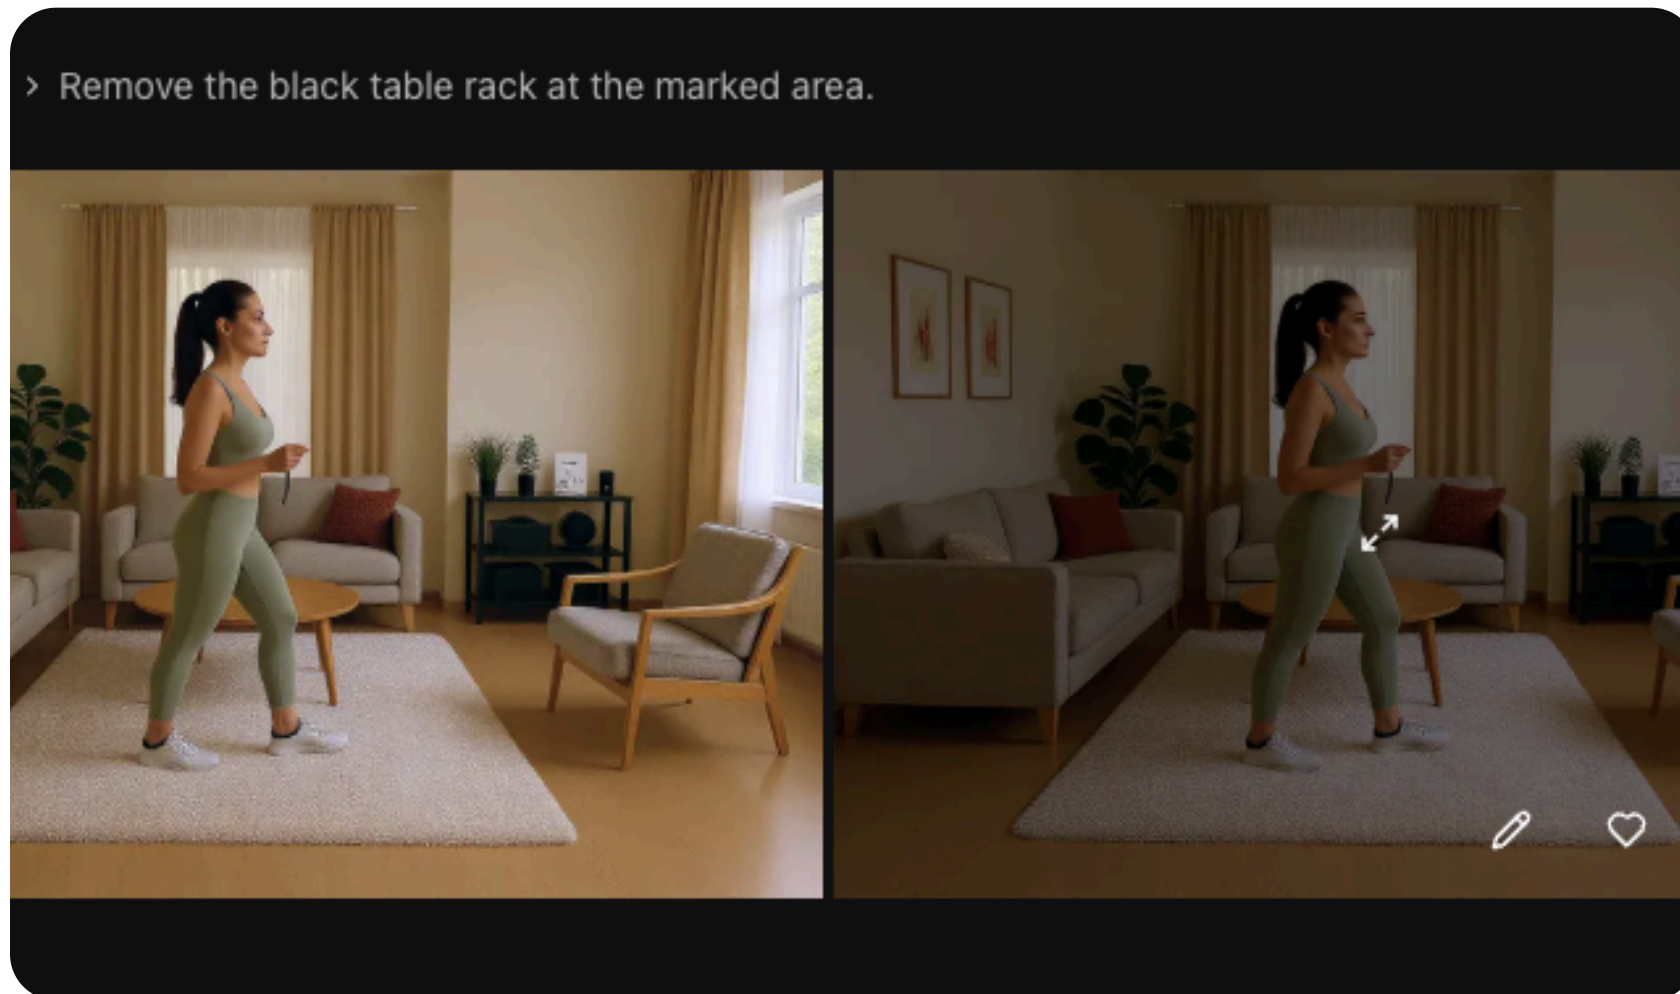

add this second image should the bottle and towel to placed in the near to the machine

New prompt:

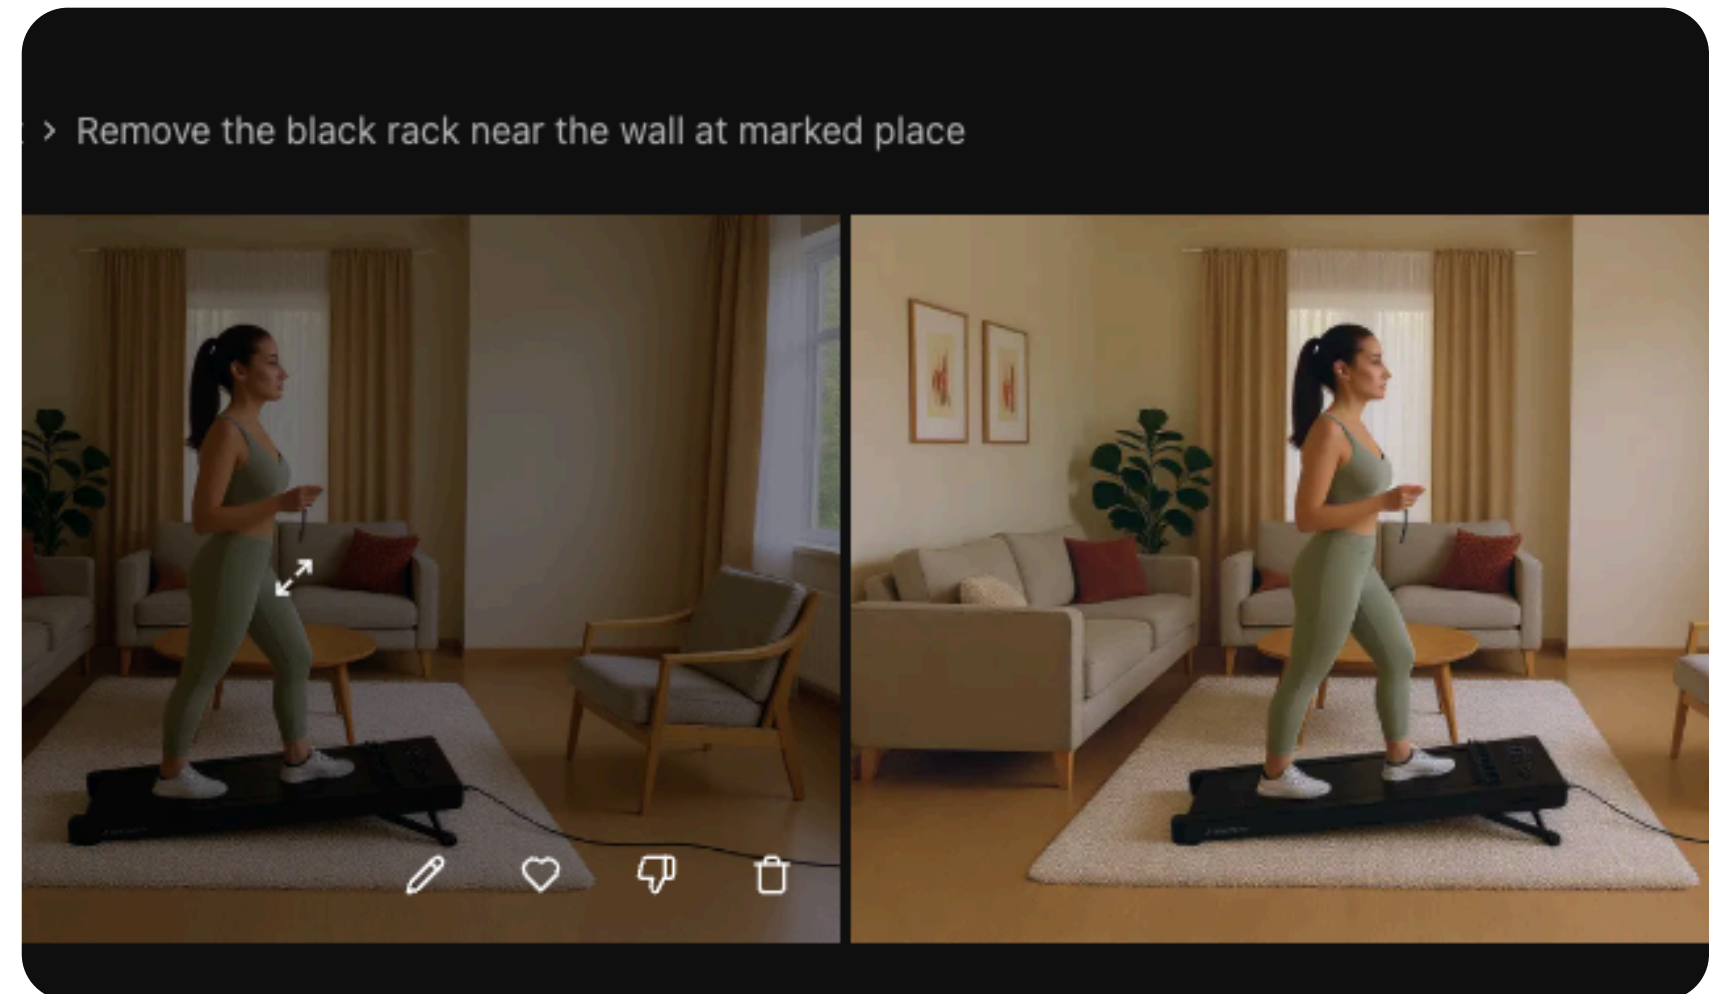

Prompt for this Image:

add this second image should the bottle and towel to placed in the near to the machine in the small size in the realistic look.

WE ATTEMPTED TO
REMOVE THE BLACK
RACK AT THIS IMAGE

THE MARKED AREA.

NEW PROMPT : REMOVE THE BLACK RACK
NEAR THE WALL AT THE MARKED PLACE.

**CHANGE THE MACHINE
TEXTURE USING THE
REALTIME PHOTOS**

Prompt for this image

change the first image machine wooden into the second image machine texture in a realistic look with matching the textures with do no change the machine position.

THANK YOU FOR YOUR ATTENTION

We used Flux for generating user-generated content by utilizing the edit option to change the background, room style, and character's outfit and appearance. In most cases, this resulted in good outcomes. However, when attempting to add elements to an already generated image by providing a reference image, the results were not as consistent. To achieve better results, we recommend refining the prompt by including more detailed content specifications.
