

**Pomelli**  
**By Google Labs**

# INTRODUCTION

Pomelli is an experimental AI-powered marketing tool developed by Google Labs in collaboration with DeepMind. Designed specifically for small and medium-sized businesses (SMBs), Pomelli aims to simplify content creation by helping brands quickly produce on-brand marketing materials — including social media posts, ad creatives, and website graphics.

Pomelli can make mistakes, so double-check it.

#### Start Strong. Stay Strong.

Focusing on the 'New Year, New Me' resolution mindset, emphasizing the feeling of fresh starts, goal setting, and self-improvement that Sportstech enables.

#### No Time? No Excuses.

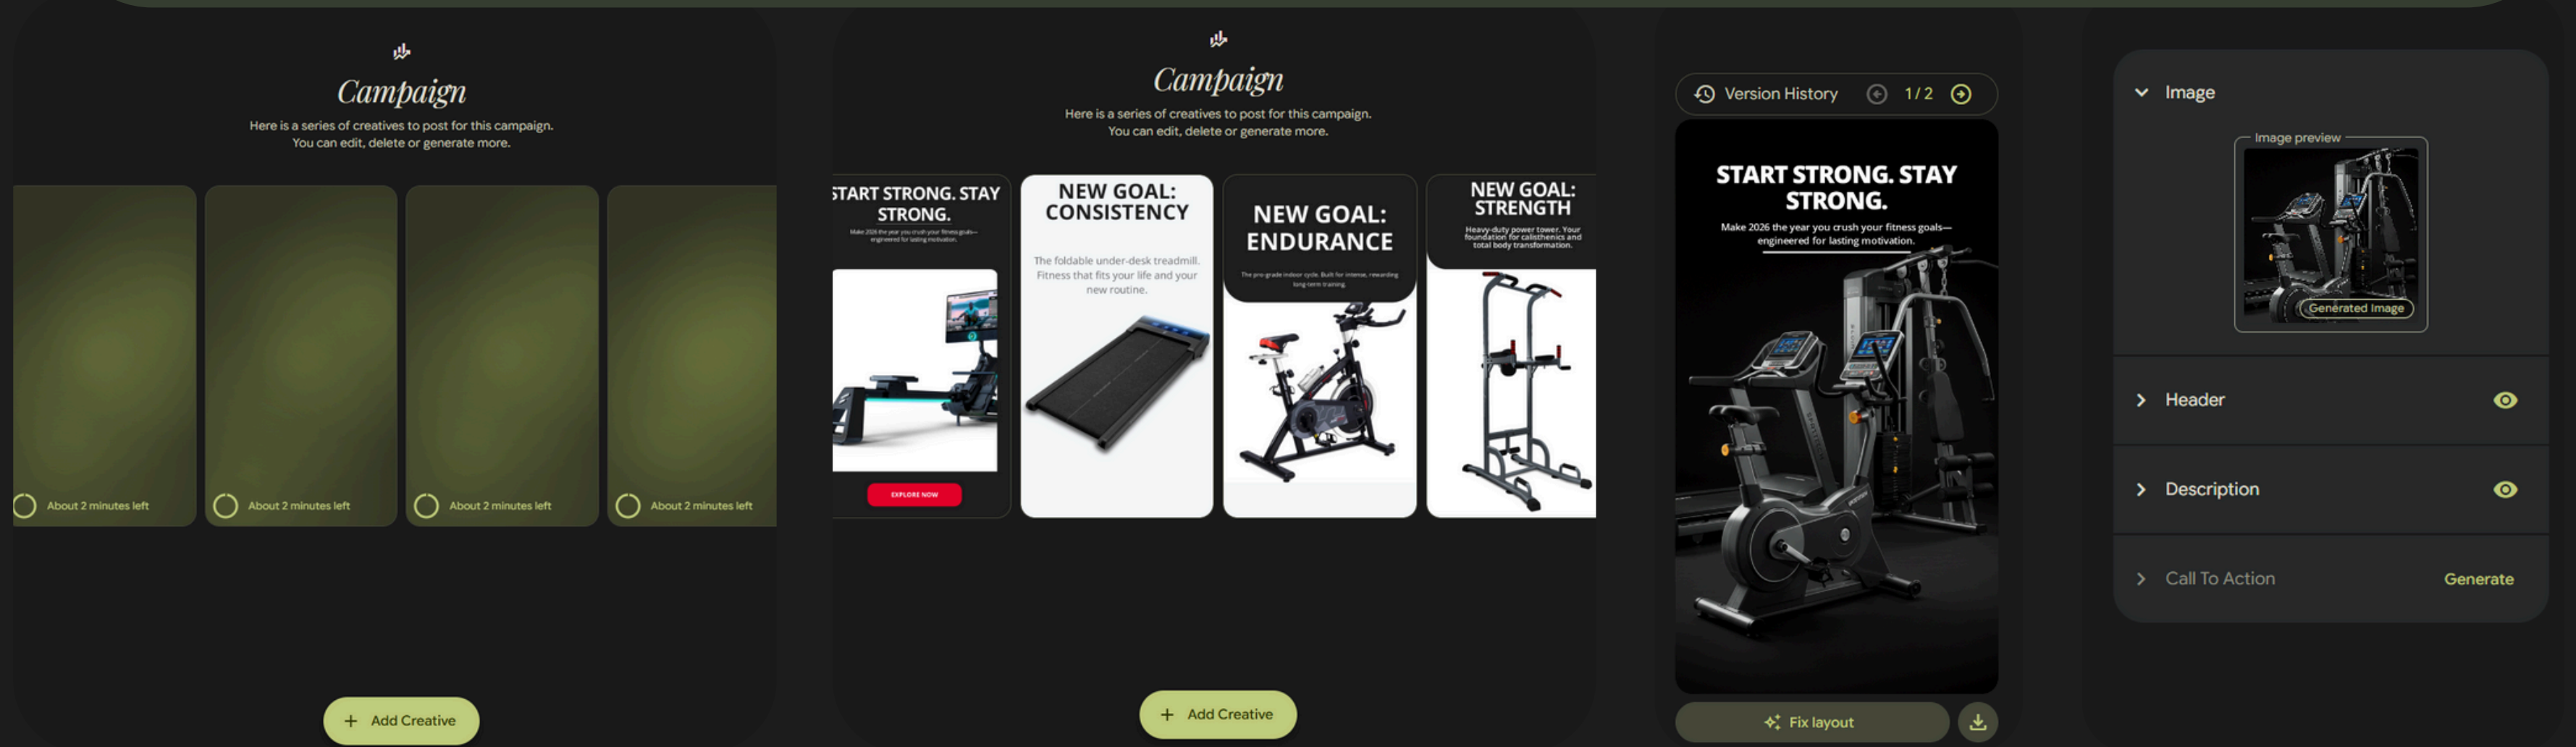

Addressing the pain point of inconsistent workouts due to time constraints, weather, or gym anxiety, positioning home fitness as the reliable solution.

#### Connect. Compete. Conquer.

Highlighting the community and shared experience features of the Sportstech Live app, focusing on virtual group workouts and friendly competition.

Pomelli provides several suggested campaign ideas based on the analyzed Business DNA. It typically offers three tailored concepts that align with the brand's style and goals. Once we select one of these ideas, Pomelli automatically generates matching visual assets and marketing images. Alternatively, we can also input our own custom prompt.

# CUSTOMIZE TEXT AND IMAGE BASED ON THE GENERATED IMAGE

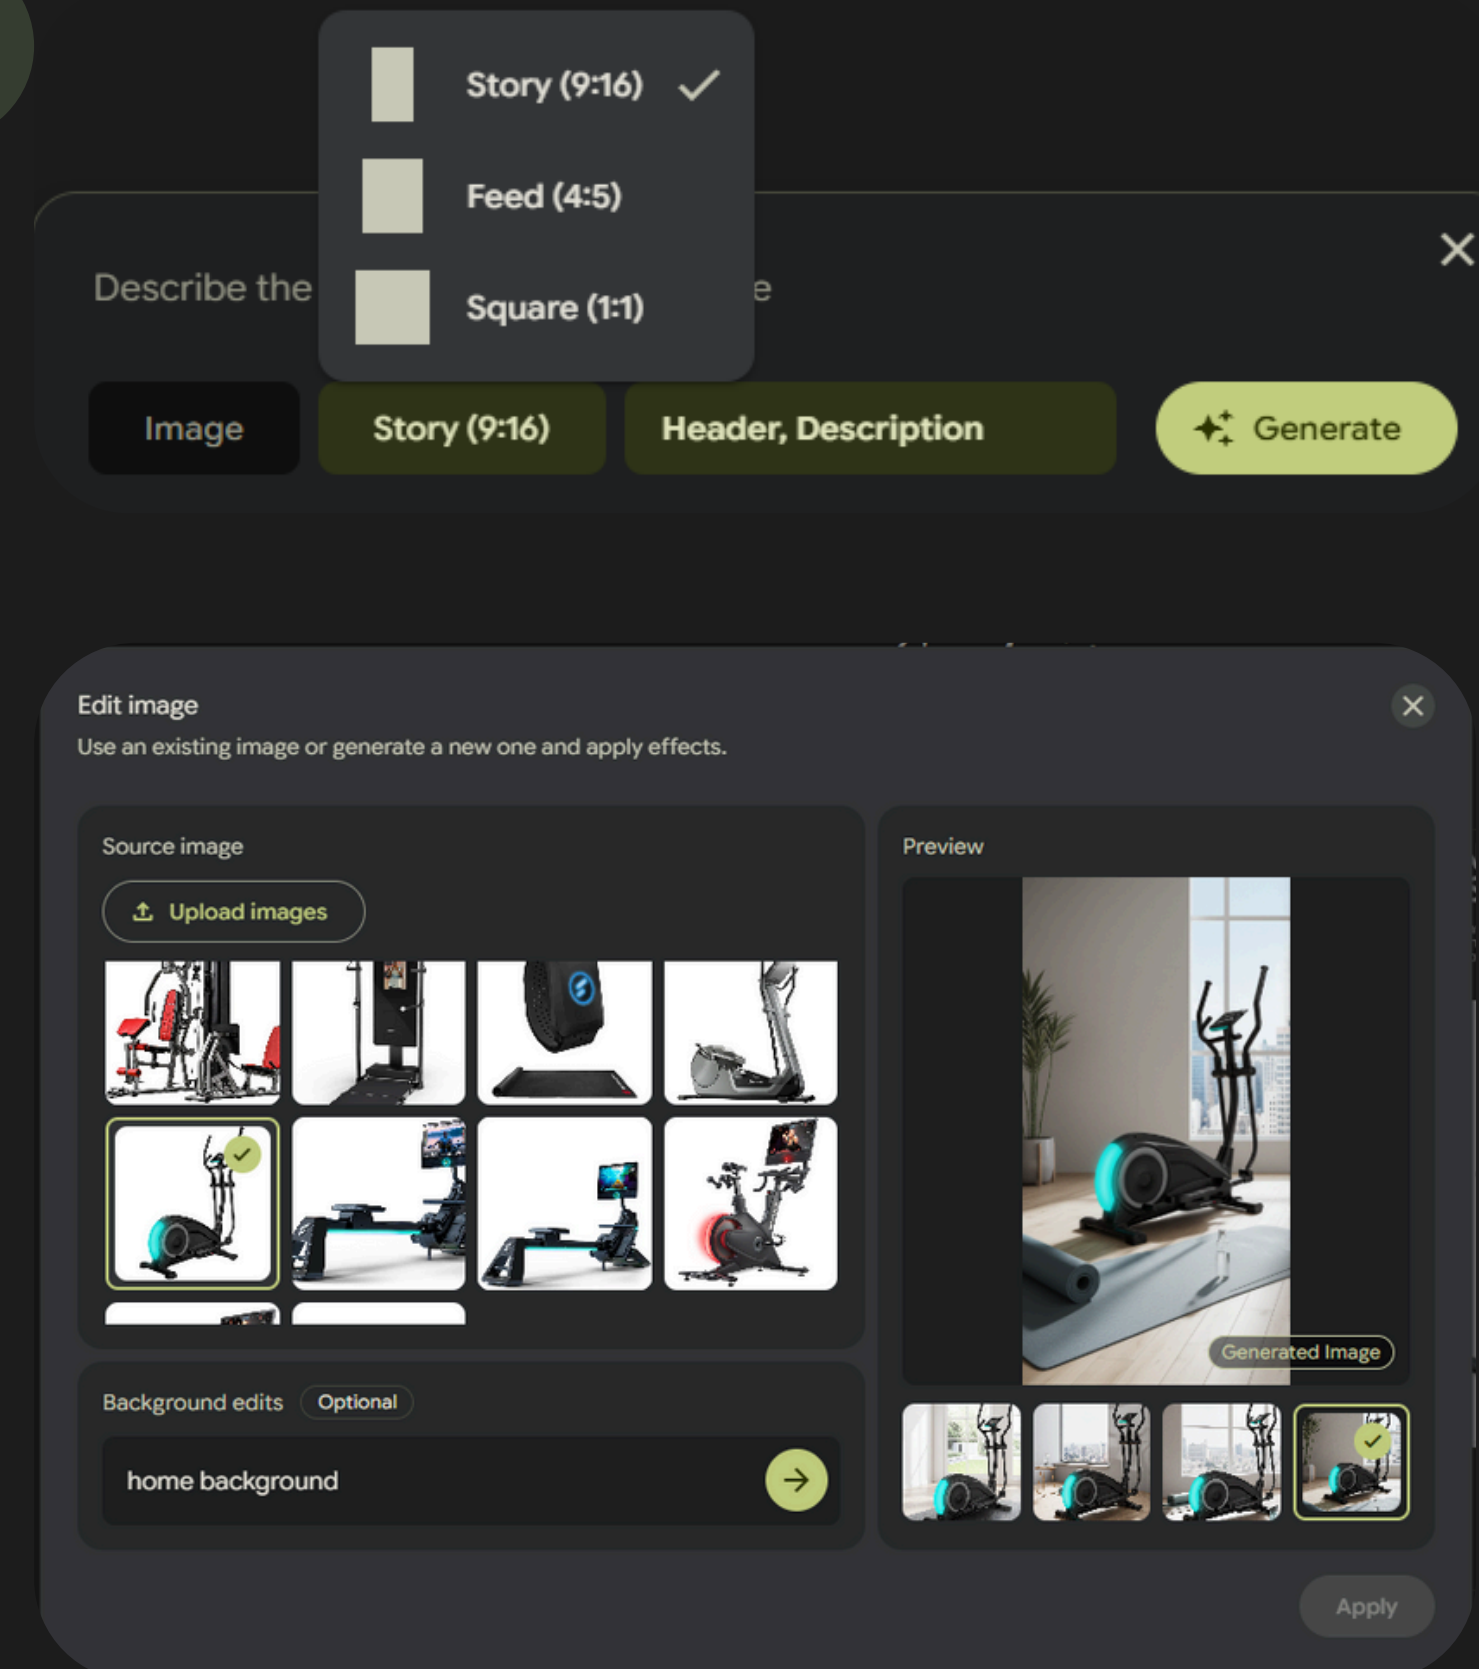

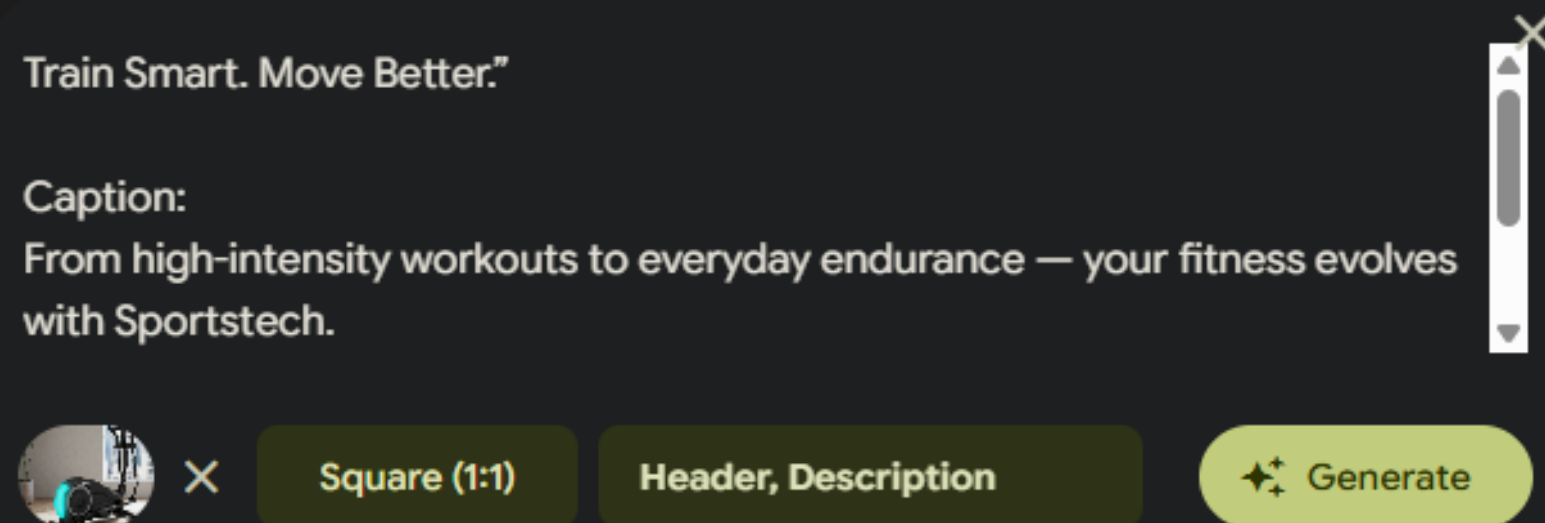

Pomelli generates images based on the selected ideas or custom prompts. You can completely customize every element, including the text, images, fonts, text placement, size, height, and colors to matching our brand style and campaign goals.

# OWN SCRIPT GENERATOR

We can generate images in three different sizes based on our own prompts, uploaded images, and custom headlines.

- First, we select or upload an image from the system.
- Second, we can modify or replace the background image for the selected visuals to better fit the campaign style.
- Finally, we choose one image and provide a tagline prompt. After a short processing time of about two minutes, the system delivers the final output — a fully generated image with the customized tagline, ready for use across different platforms.

# RESULTS

## DATA-DRIVEN PERFORMANCE

your global fitness tribe on Sportstech  
Live.

**DESIGNED FOR  
YOUR SPACE.**

German engineering meets home fitness.  
Compact, quiet, and ready when you are.

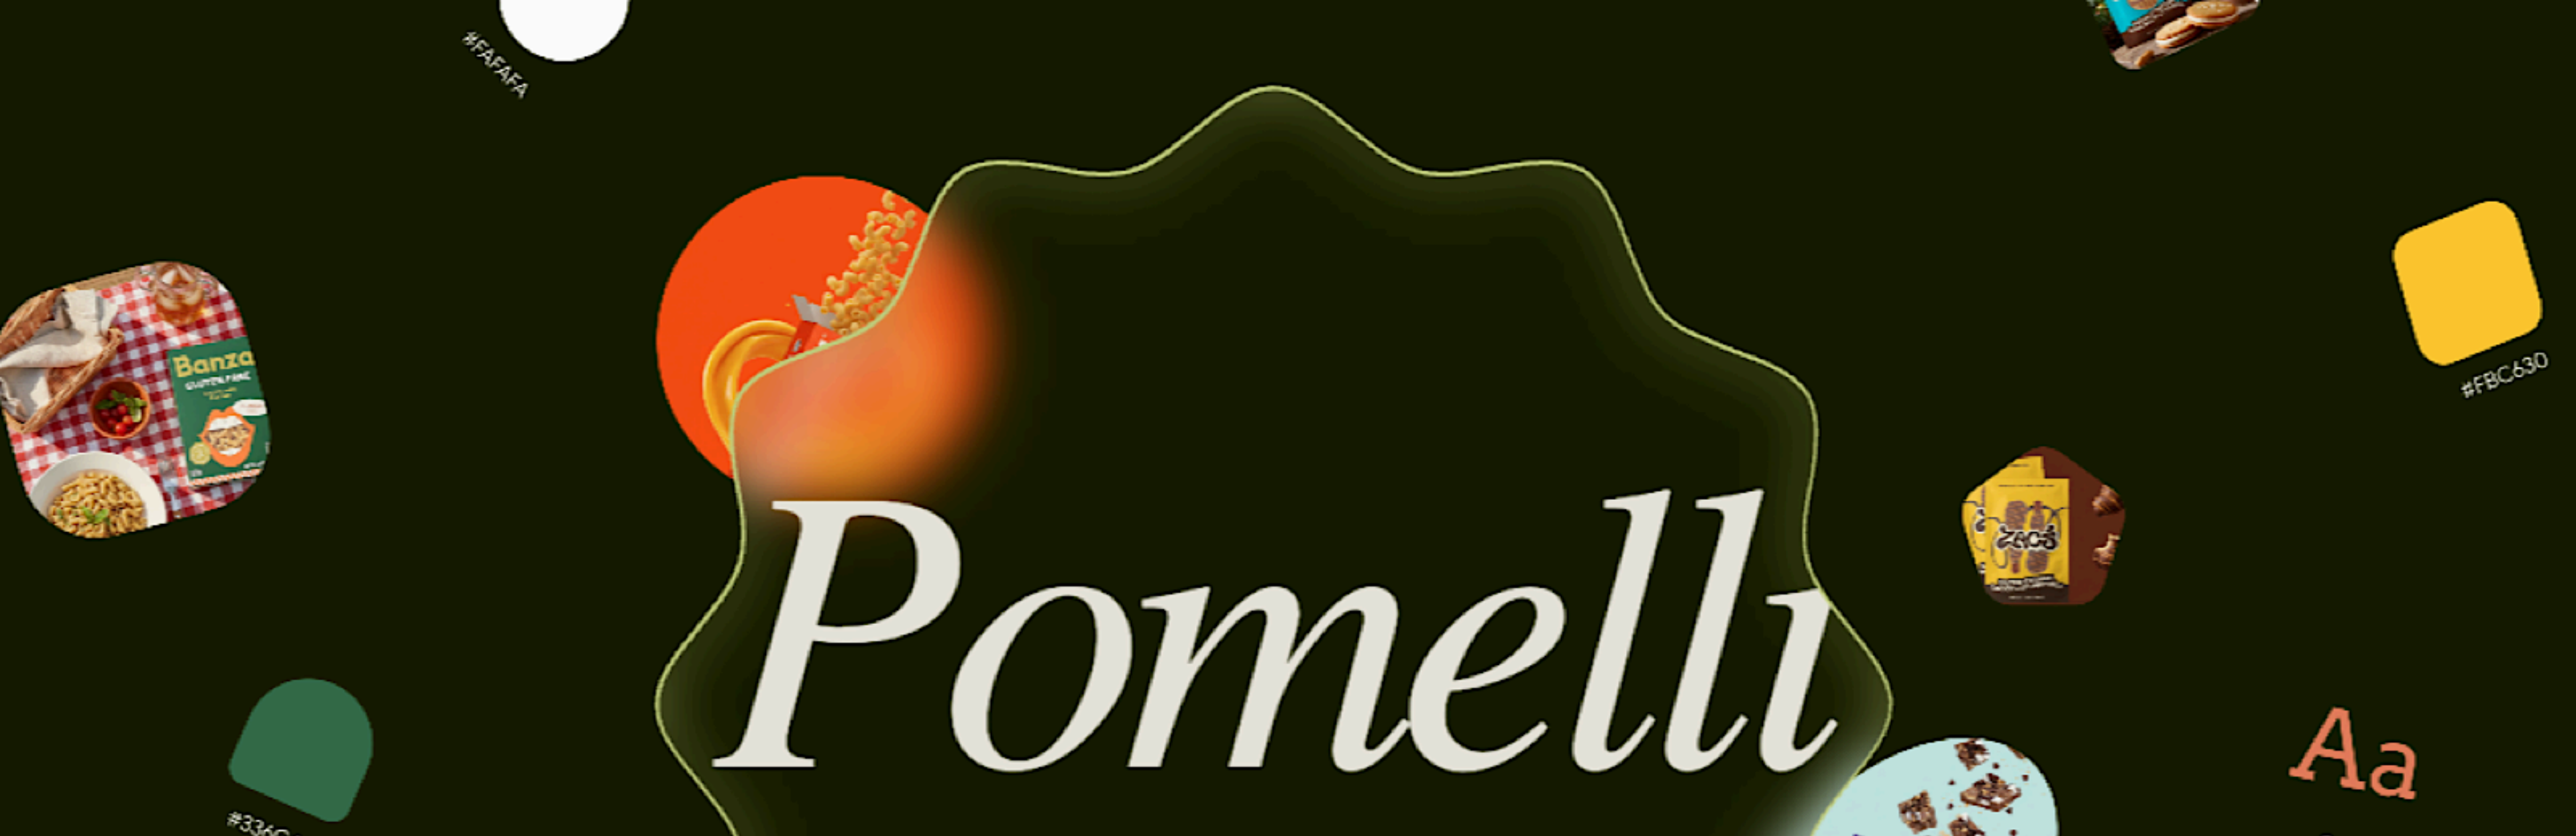

# CONCLUSION

## PRO

- Image generation is fast and delivers high-quality output.
- Offers multiple customization options based on the generated images.
- Performs very well when adjusting or refining created visuals.

## CON

- Currently supports image generation only in **9:16** size format.
- Does not allow the use of custom fonts within the AI tool.
- The creative option provides additional size settings, but users cannot fully customize the final output dimensions.
- In some cases, logos or machine images may appear distorted or collapsed in the generated results.

**THANKYOU**
